ABOUT ME

The passion for technology has accompanied me since childhood, where I was already programming some online game servers. I'm a cybersecurity enthusiast and passionate about everything that involves technological solutions through programming, algorithms and good coffee. I come from a family of salespeople and entrepreneurs, so I also have roots in the commercial area. I have the ability to adapt easily, both in new situations and with new people. I believe there is no absolute right and that all new ideas and thoughts are welcome.

PROFESSIONAL EXPERIENCE

JP Morgan – São Paulo   April/2022 – Present
